

September 30, 2009
Biomedical Engineering Society Executive Board Meeting Minutes

Echoe is continuing to look into the First Aid sponsored event. BMES is looking to fund \$5 of the \$30 cost of the price to become first aid certified for any interested student. The perspective day for this event will be Wednesday, September 30, 2009 around our normal meeting time.

We have decided not to use the Ropes Course as a social this semester.

Thelma is still looking into scheduling a plant tour with GE Healthcare, Cardinal Healthcare and the University of Wisconsin-Madison Biomedical Engineering Department, for the first weekend in November, which is November 6th and 7th. This includes hotel prices, times available for tours and other necessary information for planning this trip.

Steph will create a design for the t-shirt sale, that would say "I heart Biomed" with an anatomically correct heart. The t-shirts will be dark blue with white writing. The Michigan Tech logo will be on the sleeve. We have an order form, so that the correct number of shirts are ordered. We plan on selling them for \$12 each.

Steph is also working on getting everything in order for the Wreath Fundraiser, which will take place in November.

David talked to the Dean of Students office, and in order to compile scoop, he must talk to Dr. Neuman. He and Echoe will meet with him sometime next week to discuss an Academics folder.

Our next Executive Board meeting will be Wednesday, October 14th, at 7pm, in the Biomed Conference Room unless otherwise posted. We will be finalizing plans on the CPR/First Aid event, Pumpkin Carving social and plant tours.
